PROFILE SUMMARY

Enthusiastic ECE student with a strong foundation in programming, data analytics, and AI concepts. Experienced in full-stack development through an Infosys internship and certified by IBM, Microsoft, and Deloitte. A quick learner with analytical thinking, effective communication skills, and a passion for building data-driven and software solutions.

EDUCATION

B.Tech – Electronics & Communication Engineering (ECE)

MLR Institute of Technology, Hyderabad
CGPA: 8.45 | Expected Graduation: 2027

Intermediate (MPC)

Sri Chaitanya Junior Kalasala
Percentage: 96.5% | 2023

Secondary School (CBSE – Class X)

Jawahar Navodaya Vidyalaya, Siddipet
Percentage: 83.5% | 2021

SKILLS

Programming Languages	C, Java
Web Technologies	HTML, CSS, Spring Boot
Database	MySQL
AI / Data	Generative AI (IBM), Data Analytics (Deloitte), AI Concepts (Microsoft)
Core CS	Data Structures & Algorithms (DSA)
Tools	IntelliJ IDE, VS Code, GitHub, Railway

CERTIFICATIONS

Oracle Java Foundations	LinkedIn Learning / Oracle • LinkedIn Learning
Data Analytics Job Simulation	Deloitte • Forage
Web Development Fundamentals	IBM SkillsBuild • IBM / Credly
Getting Started with Generative AI	IBM SkillsBuild • IBM / Credly
AI Concepts for Developers & Tech Professionals	Microsoft Learn • Microsoft
Automated Task Reminder & Tracking Application	Infosys Springboard • Infosys

EXPERIENCE

Virtual Internship – Software Development

Infosys | Feb 2026 – Apr 2026

- Developed an Automated Task Reminder & Tracking Application to manage and schedule tasks.
- Implemented full-stack logic using Java, Spring Boot, MySQL, HTML, CSS, and JavaScript.
- Practiced SDLC concepts including debugging, unit testing, and code review.
- Completed Infosys Springboard Internship 6.0 (B13) — Certificate issued June 2026.

PROJECTS

Automated Task Reminder & Tracking Application

Live: task-remainder-app-production.up.railway.app/login

- Built a full-stack web app using Java, Spring Boot, MySQL, HTML, CSS, and JavaScript.
- Features: task scheduling, email reminders, and real-time status tracking dashboard.

Air Quality Index IoT-based System using Arduino

- Designed an IoT system to monitor and display real-time air quality data using Arduino sensors.
- Integrated sensor data with a display module to visualize AQI levels and trigger alerts.
